## WHERE MANUFACTURING COMES TOGETHER

SME is the only place where leading manufacturing information and expert contacts come together for engineering educators. As an SME member, you will enjoy access to the latest resources and information that span manufacturing disciplines and industries, so you can help your students learn about the options available to them. SME can help you strengthen your curricula, extend resources for your students, and help them find jobs upon graduation.

INFORMATION

Society of  
Manufacturing  
Engineers

"SME is considered our second home. I've increased my visibility through opportunities to interact with a rich diverse group of professionals. As a result of these networks and relationships, faculty and staff have been able to provide higher quality programs for students, interaction with local industries and an increased number of federal research proposals."

**Dr. Ismail Fidan, PhD**

Faculty Advisor at Student Chapter S215  
Associate Professor at Tennessee Tech University  
2003 Outstanding Young Manufacturing Engineer  
Award recipient
