## What am I looking for?

Check for general info such as pricing, description of what the product does, etc.

## Where do I find it?

For most of the items, the best place to start is the Apple website: [apple.com](http://apple.com)

If you are still having problems, a quick web search should help you find what you're looking for.

When you have found enough info, please close the iBook to indicate you are ready to report your findings.
